

FACT SHEET AS OF 03/31/2024

The BondBloxx BBB Rated 10+ Year Corporate Bond ETF seeks to track the investment results of an index composed of BBB-rated, fixed-rate, taxable U.S. dollar-denominated corporate bonds issued by U.S. and non-U.S. corporate issuers with remaining maturities of greater than or equal to ten years.

KEY FEATURES

- **Outperformance potential:** Exposure to BBB-rated corporate bonds, a persistent outperformer within the U.S. investment grade universe.¹
- **Consistently higher income:** BBB-rated corporate bond outperformance has been driven by its historically higher average coupon income compared to broad U.S. corporate indices.²
- **More precise exposure:** Targets more precise maturities of 10+ years within the BBB universe, enabling investors to better manage portfolio duration and implement active views with a single fund.

FUND CHARACTERISTICS

Weighted Average Maturity	22.40 yrs
Standard Deviation (3y)	
Option Adjusted Duration	12.45
Spread Duration	12.40
Option Adjusted Spread	133.28
30-Day SEC Yield	5.54%
Yield to Worst	5.66%
Number of Issuers	202

SUB-SECTOR BREAKDOWN

KEY FACTS

Fund Launch Date	01/25/2024
Expense Ratio	0.19%
Benchmark	Bloomberg US Corporate BBB 10+ Year Index
Number of Securities	594
Net Assets	\$4,990,458
Shares Outstanding	100,000
Ticker	BBBL
CUSIP	09789C762
Exchange	NYSE Arca

TOP 10 ISSUERS* (%)

AT&T INC	4.72%
ORACLE CORP	4.13%
VERIZON COMMUNICATIONS	3.73%
AMGEN INC	2.92%
CHARTER COMM OPT LLC/CAP	2.61%
CVS HEALTH CORP	2.51%
T-MOBILE USA INC	2.09%
ENERGY TRANSFER LP	1.94%

¹Source: Bloomberg, as of 12/31/23. Based on the ICE BofA BBB US Corporate Index compared to the ICE BofA US Broad Market Index, the ICE BofA US Treasury Index, the Bloomberg US MBS Index, and the Bloomberg US ABS Index, comparing 1-, 3-, 5- and 10-year annualized returns.

²Source: Bloomberg, as of 12/31/23. Based on the ICE BofA BBB US Corporate Index compared to the ICE BofA US Corporate Index, the ICE BofA AAA US Corporate Index, the ICE BofA AA US Corporate Index, and the ICE BofA Single- A US Corporate Index, comparing the average yield to maturity over the last 10 years.

SECTOR BREAKDOWN (%)

Industrial	82.18%
Financial	10.40%
Utility	6.32%
Cash and Equivalents	0.51%

CREDIT RATING BREAKDOWN (%)

Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BondBloxx and takes the medium rating of the three agencies when all three agencies rate a security, the lower of the two ratings if only two agencies rate a security, and one rating if that is all that is provided. Ratings are expressed as letters ranging from 'AAA', which is the highest grade, to 'D', which is the lowest grade. Unrated securities do not necessarily indicate low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

PERFORMANCE

	1 Year	3 Year	5 Year	10 Year	Since Inception (Annualized)
NAV					1.11%
Benchmark					1.22%
Market Price					0.36%

The performance quoted represents past performance and does not guarantee future results. The investment return and principal will fluctuate. Investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800-896-5089.

MATURITY BREAKDOWN (%)

This chart represents the amount by percentage (%) maturity breakdown of bonds in the fund.

GROWTH OF \$10,000 USD SINCE INCEPTION

The Growth of \$10,000 chart reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses were deducted.

GLOSSARY

Spread Duration:

A measure of the potential responsiveness of a bond or portfolio price to changes in credit spread.

Weighted Average Yield to Maturity:

The discount rate that equates the present value of a bond's cash flows with its market price (including accrued interest). The Fund Average Yield to Maturity is the weighted average of the fund's individual bond holding yields based on Net Asset Value ("NAV"). The measure does not include fees and expenses. For callable bonds, this yield is the yield-to-worst.

Weighted Average Coupon:

The average coupon rate of the underlying bonds in the fund, weighted by each bond's face value.

Option Adjusted Spread:

For a bond, the option-adjusted spread is the measurement of the spread between the bond and the underlying government yield curve. For an Index, the average of its constituent security government option-adjusted spreads, weighted by full market value.

Option Adjusted Duration:

A measure of the potential responsiveness of a bond or portfolio price to parallel shifts in interest rates.

Benchmark:

Indexes or averages that track a particular market or market segment.

Standard Deviation:

Standard deviation measures the dispersion of a dataset relative to its mean (average), and is often used as a measure of relative risk of an asset. A high standard deviation indicates a more volatile security.

30-Day SEC Yield:

The 30-Day SEC Yield represents net investment income earned by the Fund over the 30-Day period, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-Day period.

Yield to Worst:

A measure of the lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.

Disclosures

Carefully consider the Fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the Fund's prospectus, and if available, summary prospectus, which may be obtained by calling 800.896.5089 or by visiting bondbloxxetf.com. Read the prospectus carefully before investing.

The **Bloomberg US Corporate BBB 10+ Year Index** measures BBB-rated, fixed-rate, taxable corporate bonds with maturities of 10+ years.

The Fund is a newly organized entity and has no operating history. The Fund's income may decline if interest rates fall. An increase in interest rates will generally cause the value of securities held by the Fund to decline, may lead to heightened volatility in the fixed income markets and may adversely affect the liquidity of certain fixed-income investments, including those held by the Fund. Debt issuers and other counterparties may be unable or unwilling to make timely interest and/or principal payments when due or otherwise honor their obligations. Investing in mortgage- and asset-backed securities involves interest rate, credit, valuation, extension and liquidity risks and the risk that payments on the underlying assets are delayed, prepaid, subordinated, or defaulted on. Investment grade bonds have ratings of BBB- or above. High yield bonds have ratings of BB+ and below. BBB-rated bonds are typically subject to greater risk of downgrade than other investment grade bonds, especially during an economic downturn or substantial period of rising interest rates. Any downgrade of such bonds would relegate such bonds from the investment grade universe to the high yield (or "junk" bond) universe, which could negatively affect their liquidity and their value.

Privately issued securities are generally not traded on established markets. As a result of the absence of a public trading market, privately issued securities may be deemed to be illiquid investments, may be more difficult to value than publicly traded securities and may be subject to wide fluctuations in value. The Fund is classified as a "non-diversified" fund under the 1940 Act. The Fund may be susceptible to an increased risk of loss to the extent that the Fund's investments are concentrated in the securities and/or other assets of a particular issuer or issuers, sector, sub-sector, market segment, market, industry, group of industries, country, group of countries, region or asset class.

ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. NAV Returns are calculated using the daily 4:00pm net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.
